

Connie Huang

Placeholder Resume / CV File

This is a placeholder PDF so the 'Download CV' button on your e-portfolio works immediately after deployment.

To finish this section:

1. Export your real resume/CV as a PDF.
2. Name it exactly: `Connie_Huang_CV.pdf`
3. Replace this file at: `assets/resume/Connie_Huang_CV.pdf`
4. Commit and push to GitHub -- the download button will automatically point to your real file, no code changes needed.
